

Margarita Nikolaevna Shurupova (born in 1982) is Candidate of Biological Sciences, senior lecturer at the Department of Botany. The theme of her candidate's work was "Ecology and Biology of Rare *Saussurea* Species in the Kuznetsk Alatau". She reads the disciplines "Lower Plants", "Forest Phytopathology", "Anatomy and Morphology of Higher Plants", "Botanical Microtechnics", etc. The field of scientific interests includes plant conservation, population biology, economic botany, biomorphology and plant reproductive biology. She has extensive field work experience in expeditions. Currently she participates in several research projects as a leader and implementer and conducts monitoring studies of rare and invasive plants' populations.
